Art Unit: 1641

1) The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2) The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3) Claims 24-³⁹~~37~~ are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The following problems are noted.

a) There is no description, either generic or specific, of any of the methods recited in claims 24-37.

b) The written description of the invention as it is described in the specification requires, at a minimum, the use of a chemical moiety of the structure depicted at page 6, line 20 which structure is not required in any of the methods of claims 24-37.

c) There is no description in the specification of the sequence of steps recited in any of independent claims 24-26 and 33. The generic description of the invention set forth at page 24 of the specification, Inducing the emission of electromagnetic radiation, does not describe any of the steps or required limitations (for example, in claim 24, "a chemical moiety *which is not oxidized to a high oxidation state at said electrochemical potential*" and "said electrochemical potential *oxidizing said agent but not said chemical moiety*") recited in the instant claims.

d) There is no description in the specification of the generic terms "chemical moiety" and "agent".

Art Unit: 1641

4) Claims 24-³⁹~~37~~ are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

a) The following terms render the claims indefinite in the absence of any description of the nature, structure and scope of these terms in the specification: "chemical moiety", "agent", and "analyte of interest".

b) The exact scope of the following claim limitations cannot be determined: the extent of oxidation of the "agent" and "a high oxidation state".

5) Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mary (Molly) E. Ceperley whose telephone number is (703) 308-4239. The examiner can normally be reached from 8 a.m. to 4:30 p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Long V. Le, can be reached on (703) 305-3399. The fax phone number for the organization where this application or proceeding is assigned is (703) 308-4556 or (703) 305-3592.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0196.
